# Formal Moduli Of Algebraic Structures

**derived algebraic geometry x: formal moduli problems** - formal completion  $\hat{x}$  can be recovered from its values on local artinian  $c$ -algebras. this motivates the following definition: definition 0.0.6. let  $c$  be an  $\mathcal{A}$ -category. a  $c$ -valued classical formal moduli problem is a functor  $n(\text{ringart } c) \rightarrow c$ . if  $x$  is a set-valued classical moduli problem and we are given a point  $2x(c)$ , we can define a **chapter iv.1. formal moduli contents** - formal moduli 3 theorem 0.2.2. for  $x \in \text{prestk laft-def}$ , the cech nerve construction is an equivalence between the category of  $y \in \text{prestk laft-def}$  equipped with a nil-isomorphism  $x \rightarrow y$  and the category  $\text{formgrpoid}(x)$ . in other words, this theorem says that, given a formal groupoid  $r$  acting on  $x$ , there is a **formal moduli problems and formal derived stacks** - formal moduli problems and formal derived stacks damien calaque and julien grivaux to the memory of jean-louis koszul a mathematician, like a painter or a poet, is a maker of patterns. if his patterns are more permanent than theirs, it is because they are made with ideas. **moduli spaces and formal operads - pdfsmanticscholar** - moduli spaces and formal operads f. guillen santos, v. navarro, p. pascual, and a. roig abstract let  $m_{g,l}$  be the moduli space of stable algebraic curves of genus  $g$  with  $l$  marked points. with the operations that relate the different moduli spaces identifying marked **formal moduli of modules over local rc-algebras - ams** - formal moduli of modules over local  $rc$ -algebras allan adler and pradeep shukla abstract. we determine explicitly the formal moduli space of certain complete topological modules over a topologically finitely generated local  $a$ -algebra  $r$ , not necessarily commutative, where  $a$  is a field. the class of topological **generators in formal deformations of categories - arxiv** - analogs of formal moduli problems known as formal  $e$ -moduli problems for  $n \geq 1$ , which are functors from artinian  $e$ - $n$ -algebras to spaces satisfying the derived schlessinger conditions, where  $e$  is the 1-operad of little  $n$ -cubes. in this context, the formal  $e$ - $n$ -moduli problems are classified by augmented  $e$ - $n$ -algebras. it is **formal deformations, contractions and moduli spaces of lie ...** - formal deformations, contractions and moduli spaces of lie algebras alice fialowski and michael penkava abstract. jump deformations and contractions of lie algebras are inverse concepts, but the approaches to their computations are quite different. in this paper, we contrast the two approaches, showing how to **formal gaga for good moduli spaces - algebraic geometry** - formal gaga for good moduli spaces the main theorem in this paper continues this philosophy, showing that formal gaga holds for good moduli space morphisms, at least when the stack has enough vector bundles." recall that a stack is said to have the resolution property if every coherent sheaf has a surjection from a vector bundle. **overview. k - scholar.harvard** - formal moduli problems and partition lie algebras lukas brantner (joint work with akhil mathew) overview. if  $k$  is a field of characteristic zero, a theorem of lurie-pridham asserts an equivalence between formal moduli problems and d.g. lie algebras over  $k$ . we generalise this equivalence to arbitrary fields by using partition lie algebras. these **drinfel'd modules: deformations of formal modules - drinfel'd modules: deformations of formal modules emanuel reinecke october 13, 2017** in addition to [dri75, x4], we also list [mat12i;mat12ii] and [hg94] as references. throughout the talk, we use the following: ... interpreted as a statement about formal smoothness of the moduli space. **on the arithmetic transfer conjecture for exotic - mathematics** - on the arithmetic transfer conjecture for exotic smooth formal moduli spaces m. rapoport, b. smithling, and w. zhang abstract. in the relative trace formula approach to the arithmetic gan-gross-prasad **moduli as algebraic spaces - uni-marburg** - moduli as algebraic spaces georg schumacher abstract. we give a general criterion for the existence of a coarse moduli space as an algebraic space. §1. introduction given the class of inhomogeneously polarized, projective manifolds over  $c$ , whose hilbert polynomial is fixed, matsusaka's big theorem on **deformation problems from dg lie algebras** - the formal moduli problem  $\text{def } g$  depends only on degrees 0;1;2 of the dg lie algebra. a precise way of stating the failure of this map to be an equivalence will be given in section 2.2 below. it says that  $\text{def } g$  only depends on the cohomology, or homotopy type, of  $g$ . the main idea is enhance the category of formal moduli problems to be sensitive
